

Product Code . JL-PET-10197

Amplitude (AM) Modulation and Demodulation Kit

Description

Amplitude (AM) Modulation and Demodulation Kit

Provides Sine waveform output Frequency variable from 20 Hz.-20 KHz.

Carrier generation output of 40 KHz and Max. 2V p-p.

AM-modulator circuit using.

AM-Demodulator using Diode detector method.

Amplitude Modulation and Demodulation Kit Manufacturer India, Amplitude Modulation and Demodulation Kit Exporters, Electronics Instruments Amplitude Modulation and Demodulation Kit, Amplitude Modulation and Demodulation Kit Suppliers, Buy Amplitude Modulation and Demodulation Kit, Buy Amplitude Modulation and Demodulation Kit Online India, Didactic, Didactic Electronics Instruments, Electronics Instruments Exporters India, Electronics Instruments Suppliers, Electronics Instruments Manufacturer.
