

Product Code . JL-PET-10198

Frequency (FM) Modulation and Demodulation Kit

Description

Frequency (FM) Modulation and Demodulation Kit

Provides Sine waveform output Frequency variable from 20 Hz.-20 KHz.

Carrier generation output of 40 KHz and Max. 2V p-p.

AM-modulator circuit using.

AM-Demodulator using Diode detector method.

Frequency Modulation and Demodulation Kit Manufacturer India, Frequency Modulation and Demodulation Kit Exporters, Electronics Instruments Frequency Modulation and Demodulation Kit, Frequency Modulation and Demodulation Kit Suppliers, Buy Frequency Modulation and Demodulation Kit, Buy Frequency Modulation and Demodulation Kit Online India, Didactic, Didactic Electronics Instruments, Electronics Instruments Exporters India, Electronics Instruments Suppliers, Electronics Instruments Manufacturer.
