

**Product Code . JL-PET-10222**

## **MSK Modulation and Demodulation Kit**

### **Description**

---

MSK Modulation and Demodulation Kit

On Board synchronized RF carrier signal generators with frequencies of 120 KHz, 200 KHz.

8 bit Digital Data generator to generate any binary input word using 8-way DIP Switch

On board two Balanced Modulator Circuit

On board Demodulator PLL Detector Circuit

**Modulation and Demodulation Kit Manufacturer India, Modulation and Demodulation Kit Exporters, Electronics Instruments Modulation and Demodulation Kit, Modulation and Demodulation Kit Suppliers, Buy Modulation and Demodulation Kit, Buy Modulation and Demodulation Kit Online India, Didactic, Didactic Electronics Instruments, Electronics Instruments Exporters India, Electronics Instruments Suppliers, Electronics Instruments Manufacturer.**
