Product Code . JL-PET-10223
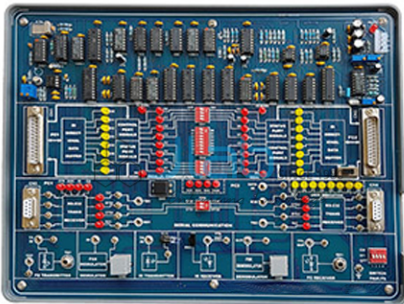

Data Communication Trainer

Description

Data Communication Trainer

Communication Protocol using Stop & Wait, Selective repeat & GO back N.

Two 9 pin D-type ports for Serial Communication.

Two 25 pin D-type LPT ports for Parallel Communication.

ASCII code identification are provided on led indicators.

Fiber optics transmission using 660nm Led peak wave length with 1meter SMA type PMMA fibre cable, Fibre optics Reception using photo detector.

Wireless Communication using 920 nm IR LED for Infrared Transmission.

Infrared Receiver using Photo detector with TTL logic output.

Modem Communication using FSK Modulation technique using RJ11 connector.

Demodulation using PLL Detector.

Data Communication Trainer Manufacturer India, Data Communication Trainer Exporters, Electronics Instruments Data Communication Trainer, Data Communication Trainer Suppliers, Buy Data Communication Trainer, Buy Data Communication Trainer Online India, Didactic, Didactic Electronics Instruments, Electronics Instruments Exporters India, Electronics Instruments Suppliers, Electronics Instruments Manufacturer.
