

Product Code . JL-DSO-10354

Losses Due to Friction In Pipe Line

Description

Losses Due to Friction In Pipe Line

It is precisely designed for use in scientific industry, making use of hi tech tools and equipment.

We conduct various quality inspections to make sure that no compromise is done with the quality of our Losses due to friction in pipe line.

This has gained us huge applaud from our clients leading to highly increasing demands in the market.

Experimental List:-

To determine the friction factor (Coefficient of discharge) for the 4 different material of pipes.

Technical Specifications:-

Pipe line:- 4 Nos. of different Material having same inner diameter of 15mm.

Piezometer Tubes:- For measurement of water level in Measuring tank

Measuring Tank:- 300mm x 300mm x 300mm

Sump Tank:- 600mm x 300mm x 300mm

Piping & Fittings:- GI Material used

Valves (Gun metal):- 4 Nos. is used for inlet section of 4 different pipes lines & 4 Nos. is Used For

outlet section, 1 No. For Bypass Line, 1 No. for Drain

Stop Watch:- Electronic

Pump:- 0.5HP Single Phase, 220VAC +10% CG Make

Tanks:- Made of strong metal sheet.

Setup fitted on angle iron frame of size 1280 × 330 × 910 (mm)

The whole set-up is well designed and arranged in a good quality painted structure.

Power Requirement:- 220 VAC +10% , 50 Hz

Standard Accessories:-

Mercury for manometer, Power cable, Instruction Manual.
