

Product Code . JL-DPS-10420

0 - 30V / 2A Programmable DC Power Supply

Description

0 - 30V / 2A Programmable DC Power Supply

Description:-

The front panel with keypad and cursor, makes it user friendly.

It can be set to use as a Constant Voltage and Constant Current source.

With low ripple and excellent Line and Load regulation, JLab is fully protected against over load, over voltage, over current, over heat and short circuit .

Programmable Power Supply is a versatile instrument with facility to interfaced with PC.

Programmable DC Power Supply Manufacturer, Programmable DC Power Supply Suppliers, Programmable DC Power Supply India, Programmable DC Power Supply Exporter, buy Programmable DC Power Supply, DC Power Supplies, Programmable DC Power Supply India, Test and Measurement Equipment, Programmable DC Power Supply, Programmable DC Power Supply Manufacturer, Engineering Lab Equipment, buy Programmable DC Power Supply Online India.

Features:-

Step increment for Voltage

User friendly settings of Voltage and Current using keypad and encoder

DC 0 - 30 V / 2 A

Constant Voltage source and Constant Current source

PC interface USB

LCD screen for Voltage and Current readout

Current limit exceed indication (LED)
