

Product Code . JL-DPS-10421

0 - 32V / 3A Programmable DC Power Supply

Description

0 - 32V / 3A Programmable DC Power Supply

Description:-

The front panel with keypad and cursor, makes it user friendly.

It can be set to use as a Constant Voltage and Constant Current source.

Programmable DC Power Supply is a versatile instrument with facility to interface with PC.

With low ripple and excellent Line and Load regulation, JLab is fully protected against over load, over voltage, over current, over heat and short circuit.

Features:-

Current limit exceed indication (LED)

Step increment for Voltage

User's friendly settings of Voltage and Current using keypad and Encoder

DC 0-32 V; 0-3 Amp

Constant Voltage source and Constant Current source

PC interface USB

LCD screen for Voltage, Current & Power
