

Product Code . JL-AS-10473

High Performance Liquid Chromatography

Description

High Performance Liquid Chromatography

Description:-

Binary System with Autosampler

High Pressure Limit

Isocratic System with Manual Injector

Precise Flow Rate & Gradient

Quaternary System with Autosampler

Features:-

Multi-channel pumps

Alternative injection modes

Application & regulatory compliance service

Remote diagnose & prompt response

100Hz Sampling rate

2.5AU Linearity range

Rapid analysis achievable

9000PSI working pressure

More efficient, less consume

Modularized design

Instrument installation & various training courses

Preventive maintenance & service plans

Proactive and comprehensive service

Various detectors

Custom combination
