

Product Code . JL-AS-10474

UV-VIS Spectrophotometer

Description

UV-VIS Spectrophotometer

Description:-

With it's build-in high resolution color screen and water-proof keyboard, you can easily scan spectrum, monitor kinetic curve, measure unknown sample concentration or even print the report directly via simple operation.

UV-VIS Spectrophotometer could help you to accomplish various analysis by its advanced design and user-friendly interface.

Features:-

Versatile test solutions, with built-in bio-analytical methods

Double-beam and split beam designs

7 Inch TFT color screen WVGA (800X480), water-proofing keyboard design

Ultra-low stray light 0.03%

Supports storage & printing with USB devices, controllable by UltraUV workstation for extended functions

0.5nm optical resolution with 4 options of spectral bandwidth, 0.5/1/2/4 nm
