

**Product Code . JL-SADS-10479**

## Desoldering Station

### Description

---

Desoldering Station

Features:-

Digital calibration will be done through micro controller to avoid analog components tolerances

Burn proof silicon cable with thermal resistance up to 600°C

Set / Read of temperature

Accurate and advanced temperature Control with micro controller technology

Increase and Decrease of keys to set temperature once set the read temperature will display after two seconds by default

User-friendly operation

Password protection feature to stop tampering with set temperature by the operators for (Bulk Customers)

Temperature control accuracy  $\pm 1^{\circ}\text{C}$

Last set value of temperature is stored in memory
