

Product Code . JL-M-10482

Audio Distortion Meter

Description

Audio Distortion Meter

Description:-

JLab comes with a calibrated monitor output for Spectral Analysis and Visual inspection of input signal after filtering out the fundamental.

Audio Distortion Meter tenders a minimum residual Distortion and Noise of 0.005%.

JLab has a resolution of 0.1%, Automatic frequency range selectors, and Automatic frequency nulling with 15% capture range.

JLab is a must for all Distortion related measurements.

It is best suited for measurement & testing of high quality Audio Systems.

Features:-

Automatic nulling facility

Output for Distortion Analysis

Frequency 20 Hz to 20 KHz

LED Readout

Distortion measurement within 0.1%
