

Product Code . JL-BE-10489

Analog Circuits Development Platform

Description

Analog Circuits Development Platform

Description:-

This makes it easy to design, experiment with, and test circuitry without soldering.

Students can explore a wide variety of electronic concepts simply by sticking components into the breadboard.

Analog Circuits Development Platform is designed to fulfill requirement of performing experiments of analog electronics in a single platform.

All connections and controls are clearly marked and conveniently located.

It is also useful to build and test circuits as well as making projects related to analog electronics or when learning the subject.

It is very useful in analog electronics laboratories for performing analog experiments.

Analog Circuits Development Platform Manufacturer, Analog Circuits Development Platform Suppliers, Analog Circuits Development Platform India, Analog Circuits Development Platform Exporter, buy Analog Circuits Development Platform, Basic Electronics, Analog Circuits Development Platform India, Electronics, Analog Circuits Development Platform, Analog Circuits Development Platform Manufacturer, Educational Lab Equipment, buy Analog Circuits Development Platform Online India.

Features:-

On board Function and Modulation Generators

On board Continuity Tester

Self contained and easy to operate

On board Toggle switches and Potentiometers

Solderless breadboard

Free e-learning course

Functional blocks indicated on board mimic

On board DC and AC Power Supplies

Scope of Learning:-

Full wave rectifier

Zener diode as a voltage regulator

Transistor series voltage regulator

Transistor shunt voltage regulator

Diodes in DC circuits

Light emitting diodes in DC circuits

Half wave rectifier

Band Pass Filter

CE configuration of NPN transistor

Monostable Multivibrator using Transistor

Bistable Multivibrator using Transistor

Low pass filter

CB configuration of NPN transistor

CE Amplifier Circuit

High Pass Filter

Astable Multivibrator using Transistor
