

Product Code . JL-RE-10524

Probe Sonicator Ultrasonic Homogeniser

Description

Probe Sonicator Ultrasonic Homogeniser

Description:-

Scientifics is proud to launch new series of probe Sonicator as especially for Probe Sonicator and High Speed Homogenizers. The New series of Probe Sonicator PS are different from earlier UHB series in following features:

Tip selection modes on the control panel it self.

Ultrasonic Homogenizers are recommended for homogenization and lysis of laboratory samples that do not require traditional grinding or rotor-stator cutting techniques for processing.

In built sound proof cabinet with light arrangement.

Foot Switch arrangement.

The Scientific's Ultrasonic Homogenizers offer precision engineering with all the necessary features to create a total system for ultrasonic disruption. In biological applications, Probe Sonicator is often used to disrupt cell membranes and release cellular contents. Probe Sonicator is also used to fragment molecules of DNA. Probe Sonicator is commonly used in nanotechnology for evenly

dispersing nanoparticles in liquids and for breaking down particles to nano size.

Probe Sonicator Ultrasonic Homogeniser Manufacturer, Probe Sonicator Ultrasonic Homogeniser Suppliers, Probe Sonicator Ultrasonic Homogeniser India, Probe Sonicator Ultrasonic Homogeniser Exporter, buy Probe Sonicator Ultrasonic Homogeniser, Research Equipment, Probe Sonicator Ultrasonic Homogeniser, Analytical Research Equipments, buy Probe Sonicator Ultrasonic Homogeniser Online India
