Universal Kymograph With Inbuilt Stimulator

Description

Universal Kymograph With Inbuilt Stimulator

Description:-

This Assembly includes the Universal Kymograph with inbuilt Stimulator with a Manual containing detailed instruction of experiments.

Kymograph consisting of a revolving drum, bearing a kymograph paper on which a stylus moves up and down displaying the effects of the drugs on contractile tissues, is commonly used in experimental physiology and pharmacology laboratories in teaching institutions.

Features:-

Suitable for pharmacology and physiology experiments.

Very low power consumption.

Infra red sensor to count revolution and give feedback to generate electrical stimuli

Inbuilt stimulator.

Pre fitted with flexistand for attaching Muscle and Heart Bath.

Highly accurate speeds-0.12,0.25,1.25,2.5,12.5,25,320,640mm/sec.

Stimulator with Pulse width 0.5/1.5, single or repeat mode, frequency range of 0.5,1,3,5,7,10,15,20,50,100Hz & Voltage range of 0,5,10,15,20,25V.
