## Digital Enhanced Thin Layer Chromatograph

### Description

---

Digital Enhanced Thin Layer Chromatograph de-TLC

Description:-

TLC is an inexpensive system, specially designed for PC-based documentation and analysis of thin layer chromatography (TLC) plates.

de-TLC combines an exceptionally versatile software module with a robust and easy to use imaging system to give you an outstanding instrument for all TLC plate applications.

Scientist on a computer, using our exclusive de-TLC software, can quickly produce multi-spectral scans and calibration curves—output previously available only from more expensive equipment or complex procedures.

Built to the highest standards but at an economic cost, de-TLC is the ideal choice for your laboratory.

**Digital Enhanced Thin Layer Chromatograph Manufacturer, Digital Enhanced Thin Layer Chromatograph Suppliers, Digital Enhanced Thin Layer Chromatograph India, Digital Enhanced Thin Layer Chromatograph Exporter, Moisture Meter, buy Digital Enhanced Thin Layer Chromatograph, Digital Enhanced Thin Layer Chromatograph, Analytical Research Equipment, buy Digital Enhanced Thin Layer Chromatograph Online India**

Features:-

---

Image refining.

Keyboard shortcuts.

Image documentation.

Interactive graphical analysis.

Password protected system.

Multiple image comparisons for statistical reliance.

Export the data in pdf format.

Create customizable reports.

Search stored reports.

Inbuilt Calibration mode for periodic calibration.

Interact with results and find relevant information within seconds instead of days.
