## Science Lab Physics Basic

### Description

---

Science Lab Physics Basic

Description:-

Basic equipment for mechanics and energy experiments.

Set-up material for one working group in pre-formed tray.

Student experiment set of the student experiment system Science Lab in the field of physics.

The equipment set Science Lab Physics Basic, in combination with the mechanics sets, enables the performance of experiments at high school, college and basic university level for worldwide curriculums.

The individual trays are stackable and can optionally be closed with a lid.
