

Description

Model No. : “JL111/04”

DESCRIPTION :-

- The stethoscope is an acoustic medical device for auscultation, or listening to the internal sounds of an animal or human body.
 - It typically has a small disc-shaped resonator that is placed against the chest, and two tubes connected to earpieces.
 - It is often used to listen to lung and heart sounds.
 - It is also used to listen to intestines and blood flow in arteries and veins.
 - In combination with a sphygmomanometer, it is commonly used for measurements of blood pressure.
-
