

Description

Model No. : “JL563/031”

DESCRIPTION :-

- **Material** : Plastic
 - Used to demonstrate effect of pressure on boiling point
 - A syringe is a simple reciprocating pump consisting of a plunger (though in modern syringes, it is actually a piston) that fits tightly within a cylindrical tube called a barrel.
 - The plunger can be linearly pulled and pushed along the inside of the tube, allowing the syringe to take in and expel liquid or gas through a discharge orifice at the front (open) end of the tube.
-
