

## Description

---

**Model No.:** "JLG431/064"

### **DESCRIPTION :-**

Capacity : 20Mls

Application : Medical/surgery, Laboratory Use

Condition : Sterile

A syringe is a simple reciprocating pump consisting of a plunger (though in modern syringes, it is actually a piston) that fits tightly within a cylindrical tube called a barrel.

The plunger can be linearly pulled and pushed along the inside of the tube, allowing the syringe to take in and expel liquid or gas through a discharge orifice at the front (open) end of the tube.
