

Product Code . JL-M-1272

Magnaprobe Magnetic Gimbal

Description

Magnaprobe Magnetic Gimbal

- It consists of a small alnico bar magnet mounted in freely rotating gimbal.
- It rotates in 3D so that all x, y and z co-ordinates, three-dimensional magnetic force fields, can be mapped.
- Strong plastic construction.

Magnet:

- 0.74 inch (19 mm) Length

Total Length:

- 4.75 inch (158mm)
-
