Demonstration Lever Balance

Description

Demonstration Lever Balance

- This easy-to-use balance is designed to demonstrate the principle of operation and mechanical advantage of levers.
 - An effective way to help students comprehend the relationship between length of the lever arm, moment of force, and amount of force.
 - When the weights on the lever are adjusted to establish equilibrium students will observe the law of torque and its properties.
 - 50cm Meter Stick - 1pc.
 - Knife Edge Clamp - 3pcs.
 - Lever Stand with Base - 1pc.
 - 50g Nickel Plated Hooked Weight - 1 pc.
 - 100g Nickel Plated Hooked Weight - 1 pc.
-
