Ripple Tank With Projection Screen

Description

Ripple Tank With Projection Screen

- A unique self contained unit in which waves are projected onto a screen for easy viewing.
 - A mirror mounted at 45 degrees in the base unit causes the reflection of the waves to be projected onto the screen, 10 in. x 9 in.
 - The light source is a stroboscope light mounted like an overhead projector.
 - The basin, 12 in. x 10 in., is removable to add or drain water.
 - Complete with adjustable 2 and 3 prong wave generators and 2 baffles.
 - Wave generation can be tuned to match light strobe.
 - Total height of unit is 26 inches.
-
