Gynecological Examination Model

Description

Gynecological Examination Model

- Soft, special material used for the external genital piece and abdominal piece allow the product to provide realistic simulation of bimanual examination (internal and external examination) and rectal examination.
 - All uteri are movable which enables the product to recreate realistic examination of conditions such as cervical motion tenderness.
 - Internal reproductive organs such as the uterus and ovaries have normal and abnormal states, and the examination of their respective disease states (intramucosalis hysteromyoma, subserous myoma, ovarian cyst, hydrosalpinx, etc.) can be practiced by changing the uterus. The uterus can be changed easily.
 - Size of the ovarian cysts and hydrosalpinx can be adjusted by pumping in air to achieve the size and texture that closely resembles a living body.
 - The product can be used for the practical training of vaginoscopy, probing, and cytology such as collection of intimal smears.
 - The genital unit can be detached easily for simple care and replacement.
-
