

Product Code . JL-DTA-2214

Disintegration Test Apparatus

Description

Disintegration Test Apparatus

Features:-

Digital timer with 1 second resolution

Accurate time out provided by microprocessor based time totalizer

Baskets move Up & Down as per IP/USP test specifications

Temperature Controlled by sensitive thermostats

Digital Tablet Disintegration Apparatus is designed for accurate estimation of disintegration time of tablets as per IP/USP standards.

The instrument is designed to test to batches of six tablets, simultaneously.

The unit consists of two beakers having capacity of 1000 cc each.

In these beakers, suitable disintegration media can be taken.

These can be temperature controlled using a in-built heater and a highly thermostat fitted inside the instrument.

Microprocessor based time to talizer is provided for accurate time readout.

Disintegration Test Apparatus Manufacturer, Disintegration Test Apparatus Suppliers, Disintegration Test Apparatus India, Disintegration Test Apparatus Exporter, Disintegration Test Apparatus, buy Disintegration Test Apparatus, Disintegration Test Apparatus, Analytical Research Equipment, buy Disintegration Test Apparatus Online India

Specifications:-

System	Digital Tablet Disintegration Apparatus
Up and Down Speed	30 rpm \pm 2 rpm
Accuracy	2%
Resolution	1 sec.
Operating Temp. Range	0 - 100°C
Power	230V \pm 10%, 50Hz.AC
Dimensions	450 mm (H) X 300 mm (W) X 320 mm (L) (Approx.)
Weight	8 Kgs. (Approx.)
