Plasma Thawing Bath

Description

Plasma Thawing Bath

- Micro Controller based Plasma Thawing Bath, which is a tabletop model, for quick thawing of plasma at 37° C.
- In this the temperature is controlled by micro controller based temperature controller.
- Our range is designed to safely and reliably thaw fresh frozen plasma (FFP) for the recovery of cryoprecipitate and hemophilic factor (AHF) and in this the temperature is preset at 4° C and maintained with $\pm 0.2^\circ$ C stability.

Special Features:

- Audio-visual alarm if temperature deviates from preset temperature.
- Display of Set value & Process value.
- Smooth acrylic tray for accommodating Plasma Bags.
- Integrated pump for internal circulation maintains precise temperature uniformity throughout the liquid medium.
- Rounded corners for better water circulation and uniformity.
- Formed in place PUF insulation improves temperature stability and energy efficiency.

Optional:

- Digital temp. Indicator-cum-controller with computer data logger.
-
