Electrical Incinerator

Description

Electrical Incinerator

We manufacture and supply Electrical Incinerator that effectively treat office and other waste.

These comprise of two chambers, electrical heater and a blower.

It is highly power efficient with less operating time.

It has a very robust design and has a high temperature refractory lining so as to protect its surface from the effect of high temperatures.

They heat up quickly and produce minimal smoke and smell.

Features:-

Robust construction

Virtually smoke and smell free with secondary burners.

High temperature refractory lining.

Quick heat up time and lesser operational time

Easy installation

Trouble free operation and maintenance

Designed to meet standards of Central Pollution Control Board (CPCB)

Specifications:-

Capacity:- 15 to 20 kg

Material:- Stainless steel
