

**Product Code . JL-NTM-244**

## Valva Suturing Training Simulator

### Description

---

#### Valva Suturing Training Simulator

- The simulators provide students with a variety of repair experiences without the constraint of time and concern for safety, which are factors with a live patient.
  - The simulators can be used by the student in a learning lab with an instructor, or by the student individually in the clinical setting just prior to a patient experience.
  - They are also useful as homework teaching aids that can be signed out at night and returned the next day.
  - In addition to being portable, the lifelike texture allows the learner to develop a “feel” for instrument handling, tension on suture, and the advantages of one method of tying knots over another.
-
