Heart With Arteries Models

Description

Heart With Arteries Models

A larger than life 6-piece model illustrates the following heart conditions:

Atherosclerosis/ Coronary Artery Disease and its progression in the Blood Vessel, Myocardial Infarction and damage, blocked artery and Left Ventricular Hypertrophy.

Heart is sectioned into 2 parts to show the thickened Ventricle Walls, and Cardiac Valves.

Four (4) individual Blood Vessels models show the progression of atherosclerosis.

Illustrated guide showing normal anatomy and various conditions included.
