## Solid Liquid Extraction Bed Type

### Description

---

#### Solid Liquid Extraction Bed Type

- This apparatus is precisely designed from premium quality stainless steel
- It is procured from well known vendors
- The offered apparatus is commonly used for performing various solid liquid extractions
- It is used in different sample preparation in lab
- Stainless Steel tanks and wetted parts
- Superb Painted structure
- Simple to operate & maintain
- Compact & stand alone set up
- The whole set-up is ingeniously designed and schematically arranged on a powder-coated rigid structure

#### Features:-

|                                 |                             |
|---------------------------------|-----------------------------|
| <b>Solvent Tank</b>             | Capacity 30 Ltrs            |
| <b>Extraction Column</b>        | Material Borosilicate Glass |
| <b>Heater</b>                   | Nichrome wire heater        |
| <b>Temperature Sensor</b>       | RTD PT-100 Type.            |
| <b>Electricity Supply</b>       | 1 Phase, 220 V AC, 1.5 kW   |
| <b>Solvent Flow Measurement</b> | Rota Meter                  |
| <b>Digital Temp. Controller</b> | 0-199.9 deg C               |

---

**Features:**

- Durability
  - High tensile strength
  - Resistance to corrosion
-
