Test Sieves

Description

Test Sieves

Specifications:-

Our test sieves are available in one piece frame of 8" diameter with suitable lid and receiver.

Its frame is made up of spun brass and without any joint in it.

It has clean rigid design of minimum weight and free from corners where the material could be lodged.

An essential feature of test sieves is that the mesh should be flat, taut and uniform and with permanent tension round the whole circumference.

Following are some other features of our product:

Uniform fabrications of the sieves permit easy and smooth nesting on each others and also with lid and receivers.

Imported stainless steel 18/8 quality or Phosphor Bronze standard sieve cloth is used for better and lasting performance.

All Sizes Available.
