Digital Theodolite

Description

Digital Theodolite

Our reputed company is reckoned as one of the distinguished manufacturers and suppliers of Digital Theodolite which consists of finished electro-optical distance measuring devices.

It is procurable in standard infrared version which allows the measurements of 3D vectors in one go.

The equipment has been designed for directional controls in tunnel excavation, appropriate marking and alignment in engineering and construction usages.

It operates on complete encoder's new algorithm that ensures that the power consumption is substantially diminished.

The Digital Theodolite is obtainable at customers centric prices and is subject to customization in line with patrons needs.

Features:-

Quality approved
