X Y axis Coordinate Geoboard

Description

X Y axis Co-Ordinate Geoboard

This pegboard has a sliding X and Y Axis with Blue colors of pegs that makes coordinate graphing fun and easy to understand.

The pegs can be used to graph points in one or all four quadrants, and show geometric translations, rotations, reflections, data in bar or line graphs, and much more.

It includes one pegboard, pegs, an X and y sliding axis, and rubber bands.

Ideal for use in lessons requiring algebraic thinking.

This unique pegboard has sliding axes that allow maximum flexibility for coordinate graphing.

Use the provided pegs and rubber bands to model points, line segments, functions, and conic sections.

The 15 x 15 grid and sliding axes allow students to illustrate numbers from -14 to 14 on both the x- and y-axes.
