

Jain Laboratory Instruments

Product Code . JL-DE-3591

Ultrasonic Scaler

Description

Ultrasonic Scaler

Ultrasonic Scaler is a powerful piezoelectric scaler with stable ultrasonic oscillation of 32KHz with very wide energy scope

Titanium Hand piece is autoclavable

Great patient comfort with high frequency and low amplitude

Hand piece: never heat up after long time use

Efficient performance to remove intractable calculus

Fine tuning control on power supply and water spray

Endodontic Function:-

Turn the power below half of Top Selector and replace tip with endo kit

(Endoholder = U-file) to operate unit for root canal preparation.

Smoother canal walls grant better obturation

Rapid and superior operating for root canal treatment

Root canal enlargement and swirling irrigation for debridement

| Minimal dentin removal keeps structural integrity of the tooth | | | | |
