Lower Rib Support with Removable Splints

Description

Lower Rib Support with Removable Splints

Limits sudden expansion of rib cage following fracture and/or surgery by providing adequate compression.

Provides firm and stable support to injured ribs and torso.

Allows comfortable breathing, helps in reducing pain and promotes healing.

Constructed from lightweight and durable foam laminated fabric mesh.

Specially contoured design for females covers 3" wide area in front and 6" at back for a comfortable and improved fit.

Removable splints at sides for adequate compression to lower ribcage.

Designed to fix from front as well as from back to provide wider adjustment and wearing comfort.

Soft padding at back provides support and avoids irritation

Hook and Loop fasteners for easy fixing.
