

**Product Code . JL-XRMAE-3907**

## **60mA 100mA X-Ray Equipments**

### **Description**

---

#### **60mA 100mA X-Ray Equipments**

Fullwave recrification which delivers almost double the output than the self rectified X - Ray Systems.

Full wave rectification with high voltage silicon rectifier for low losses and consistent radiographic results.

Smoothing circuit provides maximum mA output accuracy at all time settings.

Full field light beam Collimator for proper positioning and preventing accidental cut off the field

Continuous fluroscopic timer by pressing F\_RST push button. (100mA).

Low output power station 4Kw, for versatile, in absence of power-Line. (100mA).

Double mA range meter with lamp. (100mA).
