Solar Car Electricity JLab

Description

Solar Car Electricity

A robust solar powered car.

A very efficient way to teach and demonstrate how the solar energy and cells work.

The solar car has an in-built battery compartment to accept a re-chargeable 'AA' battery.

With the help of an in-built switch, the car can run on solar power, on the battery and also the battery can be charged.

The unit also has a pair of terminals from which a current of 2v dc can be drawn.

5inch (140mm) L x 2.75inch (70mm) W x 3inch (75mm) H.

Rechargeable battery shown, but not included.

A preview of the included instructions can be found at the bottom of this listing.
