Electrostatic Equipment

Description

Electrostatic Equipment

JLab is Manufacturer, Exporter Supplier of Electrostatic Equipment

We have developed Electrostatic Equipment as per latest industrial and scientific specifications accepted internationally.

Features of Electrostatic Equipment:-

Energy Efficient Reliable Designed to give accurate results in minimum time.

Operate on a 3 to 5 VB DC power supply Capable of providing current of 1.5 A. 1.5m three core main cable is fixed into a pair of color coded 4mm sockets.

Which connects earth core of the mains lead to the metal structure of the apparatus.

The 4mm earth sockets with power discharger of the heat equipment come with a diameter of 75mm and a comfortable grip handle.
