

Product Code . JL-PLE-4259

Different Types of wires

Description

Different Types of Wires

JLab is Manufacturer, Exporter Supplier of Different Types Of Wires

Description:-

Copper Wire Bare:- Wound on reels S.W.G. No. 20, 22, 24, 26, 28, 30

100 gm Packing

500 gm. Packing.

Copper Wire:- - Double Cotton covered (D.C.C.) for connection. S.W.G. No. 18, 20, 22, 24, 26

100 gm Packing

500 gm Packing

1 Kg. Packing

Eureka Wires :- (Constantan wire) Cu-Ni-Alloy Resistance wire bare wound on reels. S.W.G. No. 20, 22, 24, 26, 28, 30

100 gm Packing

500 gm Packing

Nichrome Wire: - (Nickel chromium Alloy Wire) High Resistance wire bare wound on reels. S.W.G No. 20, 22, 24, 26, 28, 30

100 gm Packing

500 gm Packing

Manganin Wire: -

Resistance wire bare or covered 100 gm. Packing S.W.G No. 22, 24, 26, 28, 30.

Brass Wire for Sonometer :-100 gm. Packing S.W.G No 22, 24, 26, 28.

Steel Wire: -

For Young Modulus Apparatus and Sonometer. S.W.G No 22 to 28 any 100gm Packing.

Stainless Steel Wire: -

Soft non magnetic for laboratory use. 100 gm packing S.W.G No. 22, 24, 26, 28, 30.
