

Description

Sealer Machine

The Hand Sealing Machines manufactured by us have aluminium casting body, which is coated with epoxy powder.

It has a strong and compact base for machine elevation and a changeable time control system.

Equipped with a sealing transformer, our machine offers faultless sealing and longer applicability.

Easy to operate, our product is known for its durability and corrosion, wear and tear resistance.

Should be suitable for food, medical laboratory applications.

Specifications:-

Hygiene, health, safety, easily cleanable, moisture resistant, non-corrosive sealer.

Should have dual set timer for cooling.

Stain less steel: food grade, with low voltage safety operation.

The machine is supplied with spare heater bar assembly to allow continuous production.

Technical specification:-

Sealing length max 310mm.

Sealing width max 3.

Film thickness microns 2 x 250 mm.

Cutter option NO.

Stain less steel dual timer without cutter.
