## Domestic Heating Circuit Training Panel

### Description

---

Domestic Heating Circuit Training Panel

Features:

Trainer on heating systems and plumbing.

The function of a central heating system.

High level of relevance to practice due to use of commonly available commercial components.

Specification:

Trainer for heating engineering.

Heating controller with feedback of the feed flow temperature.

4-way mixing valve DN 20.

Circulating pump.

7 rotameters.

4 plate heat exchangers as radiators.

---

5 bimetallic dial thermometers.

2 cold water connections DN 15.

2 water connections for boiler DN 15.

1 differential pressure overflow valve.

---
