Description

HIV/Aids Testing Kit, Simulated

This is an exciting, real-life science lesson activity which uses real laboratory techniques for demonstrating the HIV test for AIDS.

The JLab test uses simulated blood and reagents which are completely safe in the hands of students and teachers.

This kit has been used extensively by United Nations in its UNESCO outreach work worldwide.

Teachers guide & students notes, chemicals and equipment are included with this kit.

Sufficient reagent and materials to suit a class of 30 students.

Specification:-

The JLab Simulated ELISA Test is a hands-on activity for students that serves the following important knowledge outcomes:

Good understanding of the body's immune system and how the antigen/antibody reaction works.

It also demonstrates clearly a test that is used daily to screen blood and diagnose the presence of the disease.

It shows what goes wrong with the immune system when HIV infection occurs.

The importance of safe blood is made clear with this kit.

Blood transfusion is a life-saving practice that is administered to millions of patients every month.

The discussion in the activities in the kit bring the real-life issues of HIV into focus for the learner.

Prevention of spreading the disease can be discussed as well.
