Combo plate Micro science

Description

Comboplate Microscience

60-well micro plate used in general microtitration, special procedures and hundreds of chemistry, biology and physics education experiments.

This high grade plate is designed to the dimensions of standard 96-well and 48-well plates.

The plate is divided into 2 sections: 48 small wells (volume 0.3ml) and 12 large wells (volume approx 2.5ml).

Each well is identified by a grid reference system.

The small wells can be likened to 'micro test tubes' and the large wells to 'micro beakers'.
