

Product Code . JL-MS-7259

Polystyrene Molecular Model

Description

Polystyrene Molecular Model

Excellent quality models produced from precision engineered moulds and materials.

Molecular models help the teacher convey a concrete representation of the molecular world.

The brilliance of the Molymod range is its ease of use and accurate representation in an easily understood way.

The joining pieces are carefully designed to ensure models are firmly constructed so they can be passed around during the lesson without fear of falling apart.

They can be used by students at all levels, to represent simple substances right through to more complex structures like Buckminsterfullerene and ionic lattices.

Each kit comes in a durable storage case with compartments for segregation of parts.

The range of models included in the JLab range is designed to enhance teaching of the UK and US curricula.

These 'original' models have been used by thousands of students worldwide and are renowned for their ease of use.

Polystyrene Molecular Model Manufacturer India, Polystyrene Molecular Model Exporters, Polystyrene Molecular Model, Buy Polystyrene Molecular Model Online India, Polystyrene Molecular Model Suppliers, Didactic, Didactic Polystyrene Molecular Model, Educational Equipment.
