Electron Repulsion Atomic Orbital Model Set

Description

Electron Repulsion Atomic Orbital Model Set

Each kit comes in a durable storage case with compartments for segregation of parts.

The joining pieces are carefully designed to ensure models are firmly constructed so they can be passed around during the lesson without fear of falling apart.

Excellent quality models produced from precision engineered moulds and materials.

The range of models included in the JLab range is designed to enhance teaching of the UK and US curricula. The brilliance of the Molymod range is its ease of use and accurate representation in an easily understood way.
