## Tel tron Helmholtz Pair of Coils D

### Description

---

#### Tel tron Helmholtz Pair of Coils D

The maximum field strength generated by the coils ( $\sim 10$  mT) is approximately 300 times weaker than that produced by an MRI machine ( $\sim 3$  T), which are known to be safe for use by people with medical implants such as pacemakers.

Pair of Helmholtz coils for generating a uniform magnetic field perpendicular to the axis of the Tel tron D series tubes.

Allows the coils to be configured in the Helmholtz geometry or to produce magnetic fields aligned vertically, or coaxial, with respect to the tube axis.
