

Product Code . JL-PMMFML-7365

Polishing Mach Machine

Description

Polishing Mach Machine

We are engaged in manufacturing and supplying a fine quality range of Polishing Mach Metallurgical Polishing Machine.

This is used in various industries such as oil, metal forging, steel, and gas.

We provide this Polishing Mach Metallurgical Polishing Machine in various sizes and shapes to the client.

Clients can avail it from us at a reasonable price.

In order to deliver flawless range, it is tested on various quality parameters.

It is manufactured using the optimum quality component that is sourced from the certified vendor of the industry.

Features:-

Robust construction.

Easy installation.

Compact size.

Main Parameter:

Diameter of the polishing and grinding disc: 230mm

Diameter of the abrasive paper: 230mm

Motor of grinding head: DC brushless deceleration motor, two-phase 220V 400W

Or four-speed 250r/min, 500r/min, 750r/min, 1000r/min

Rotational speed: 100-1000r/min, stepless

Motor: DC brushless motor,two-phase 220V 400W

Cylinder pressure: adjustable (Suggest 0.2~0.3mpa)

Rotational speed of grinding head: 20~120r/min, stepless

Net weight:- 50Kg

External dimension: 420-623-645mm (include PDZ automatic grind head)
