Heat Absorption Apparatus

Description

Heat Absorption Apparatus

- To study and demonstrate heat absorption.
 - Consists of two metal pillars one white and the other painted black with holes for thermometer (not supplied) and in-between is a lamp, heat source.
 - When the lamp is switched on and the temperature is measured in the holes in the metal pillars, it can be studied which one absorbs heat quicker and more than the other.
 - After the lamp is turned off, we can also study which losses heat quicker.
 - Lamp operates on 12VDC.
 - Base Size 5.625 inch (143 mm) x 3.625 inch (92 mm) x 4.25 inch (110 mm).
 - Measurements are approximate.
-
