

Product Code . JL-H-764

Specific Heat Specimen Set of 5, 100 Grams Each

Description

Specific Heat Specimen Set of 5, 100 Grams Each

- Use these specimens in your thermodynamic experiments. Five cylinders with hooks (aluminium, copper, iron/steel, lead, and zinc) included.
 - Each has a 12 mm diameter and is of equal weight, 100 grams. Since their masses are equal, their relative heat capacities are directly proportional to their specific heat. Cylinders vary in length.
 - **Length without hook:**
 - **Aluminium:**
 - 12 Inch (303 mm)
 - **Brass:**
 - 3.78 Inch (96 mm)
 - **Copper:**
 - 3.5 Inch (89 mm)
 - **Iron / Steel:**
 - 4.49 Inch (114 mm)
 - **Zinc:**
 - 4.84 Inch (123 mm)
 - **Hook Length:** 0.5 Inch (12.5 mm)
 - Measurements are approximate.
-
