Electric Field Apparatus

Description

Electric Field Apparatus

For demonstrating electric fields between electrodes.

The apparatus includes a clear Petri dish 90mm dia. x 12mm depth.

The apparatus requires a safe, low current limited 0-5kV EHT supply.

Alongside each terminal is a thumbscrew system which permits fine adjustment of the electrodes.

Six electrodes are supplied, 2 'point source', 2 'line source' and 2 circular rings of 35 and 70 mm dia.

The transparent base (140 x 125 mm) allows the pattern to be projected via an overhead projector system.
