## Vibration Generator

### Description

---

Vibration Generator

Gives mechanical oscillations when fed by oscillator - AF amplifier.

Frequency response for the whole of the audio spectrum and beyond.

**Dimensions:-** 100 x 100 x 90mm.

**Amplitude Output:-** 4mm Maximum.

**Coil impedance:-** 3?

**Electrical Input:-** 5W.

**Frequency range:-** 30 to 10,000Hz.

**Weight:-** 1Kg.

Accessories included.

A signal generator should be used in conjunction with this product.
